

Provide information about chemicals in a flavour or fragrance blend

THIS FORM HAS MULTIPLE USES

Instructions for providing chemical identity information for your pre-introduction report

You should complete this form if all of the following apply:

- You are an introducer
- You know the proper names for the chemicals in your blend
- 2 or more chemicals to be introduced in your blend will be 'low-risk flavour or fragrance blend introductions'

You can use this form to provide identity information for up to 20 chemicals. You should upload this form with your pre-introduction report in AICIS Business Services.

Instructions for providing information about chemicals in a blend before it's first introduced

You should complete this form if all of the following apply:

- You are an introducer or the chemical identity holder for chemicals to be introduced in a flavour or fragrance blend
- You know the proper names for the chemicals in that blend
- If any of the chemicals in that blend that meet the criteria for 'low-risk flavour or fragrance blend introductions' are **not** on the IFRA Transparency List when the pre-introduction report is submitted.
- The information has not already been given to us.

You can use this form to provide information for up to 20 chemicals. You need to give us this information before the chemicals in the blend are first introduced into Australia.

You can upload this form with your pre-introduction report in AICIS Business Services (if you are the introducer). Otherwise, you can email it to reportedintroductions@industrialchemicals.gov.au.

- Giving false or misleading information is a serious offence. We may pass on the information in this form to other agencies as authorised or required by law.
- Your personal details are protected by law, including the Privacy Act 1988. Important information about how we handle your personal details is in our privacy statement at www.industrialchemicals.gov.au/privacy. You should read and understand this information before completing this form.

Use BLOCK LETTERS

Section 1: Business and contact details (Note: you must have an AICIS Business Services account)

Name of business providing this information:

AICIS Business ID:

Contact person's first name:

Contact person's last name:

If an agent is completing this form, provide your contact details:

Section 2: Name(s) of blend

By what name(s) is the flavour or fragrance blend known to the person(s) introducing the chemicals in that blend?

Section 3: Commercial business information (CBI)

Are you flagging any of the information on this form as CBI? (If your answer is 'yes', you must answer questions a, b and c of this section.)

Yes, and I understand that if the nominated person receives a section 113 notice (IC Act) then they may need to apply for CBI through AICIS Business Services.

No — go to question 4

3a. What specific information do you want to flag as CBI?

3b. Nominate the person who should receive the section 113 notice:

3c. Nominated person's AICIS Business ID:

| | |
|------------|-----------|
| First name | Last name |
|------------|-----------|

Section 4: Declaration (required)

I declare that, to the best of my knowledge, all the information I have provided is true, correct and complete.

Section 5: Provide information about the chemicals in your blend

You can use the table on the next page to do the following:

1. Provide chemical identity information if there are 2 or more chemicals in your flavour or fragrance blend that meet the criteria for 'low-risk flavour or fragrance blend introductions'.

For each of these chemicals, you must fill out the information in **column 2** (proper name — CAS or IUPAC), **column 3** (CAS number — if known) and **column 4** (any other names you use to refer to your chemical).

2. Provide information about any chemicals in your flavour or fragrance blend **before** they are first introduced that are **not** on the IFRA Transparency List when the pre-introduction report is submitted. Note: If you've already given us this information, you don't need to provide it again.

For each of these chemicals, you must fill out the information in **column 2** (proper name — CAS or IUPAC), **column 3** (CAS number — if known) and **column 5** (details of any hazard characteristics known to you). Filling out the information in column 4 is optional.

In **columns 6 and 7**, you will need to provide the concentration of the chemical in the flavour or fragrance blend, which will generally be the same at introduction and end use. You **don't** need to work out the concentration of the chemical in each type of product at end use.

Section 5: Provide information about the chemicals in your blend (continued)

| Chemical | Proper name (CAS or IUPAC) | CAS number (if assigned) | Any other names you use to refer to your chemical | Details of any hazard characteristics known to you | Maximum concentration of your chemical in the blend at introduction (%) | Maximum concentration of your chemical in the blend at end use (%) |
|-----------------|-----------------------------------|---------------------------------|--|---|--|---|
| 1 | | | | | | |
| 2 | | | | | | |
| 3 | | | | | | |
| 4 | | | | | | |
| 5 | | | | | | |
| 6 | | | | | | |
| 7 | | | | | | |
| 8 | | | | | | |
| 9 | | | | | | |
| 10 | | | | | | |

Section 5: Provide information about the chemicals in your blend (continued)

| Chemical | Proper name (CAS or IUPAC) | CAS number (if assigned) | Any other names you use to refer to your chemical | Details of any hazard characteristics known to you | Maximum concentration of your chemical in the blend at introduction (%) | Maximum concentration of your chemical in the blend at end use (%) |
|----------|----------------------------|--------------------------|---|--|---|--|
| 11 | | | | | | |
| 12 | | | | | | |
| 13 | | | | | | |
| 14 | | | | | | |
| 15 | | | | | | |
| 16 | | | | | | |
