Australian Industrial Chemicals Introduction Scheme

Introduction categories

If your chemical introduction is not listed on the Inventory

Listed

- The chemical is on the Inventory
- Can be introduced if it's within the terms of the Inventory listing
- Keep records

Exempted

- It's a very low-risk introduction
- Submit a once-off declaration after you introduce
- Keep records

Reported

- It's a low-risk introduction
- Submit a once-off report **before** you introduce
- Keep records

Assessed

- It's a medium- to high-risk introduction
- · Apply for an assessment
- Assessment certificate needed **before** you introduce
- Keep records

Commercial Evaluation Authorisation

- Determine the chemical's commercial potential
- · Apply for an authorisation
- Commercial Evaluation Authorisation needed before you introduce
- · Keep records

Categorisation: based on <u>risk</u>

Deciding between Exempted, Reported and Assessed

Risk of introduction of a chemical

=

hazard (effect of chemical on humans or environment) Χ

exposure

(amount of chemical humans or environment come in contact with from introduction and use)

<u>Introductions</u> are categorised, NOT chemicals

Very low risk

→ Exempted

(once-off declaration after introduction)

Low risk

ightarrow Reported

(once-off report before introduction)

Medium to high risk

→ Assessed

(pre-introduction assessment and approval)

ICNA Act

Exemptions

- R&D
- Transshipment
- Non-cosmetic<100kg
- Cosmetic < 100kg
- Cosmetic <1%

Pre-intro assessment and payment

Permits

- LVC100
- **LVC1000**
- CEC
- CUP
- EOP
- Permit renewal
- EIP

Certificates

- PLC (until recently)
- LTD
- STD
- EX
- Self assessment

Pre-intro assessment and \$\$\$\$

-IC Act

Introduction categories

If your chemical introduction is not listed on the Inventory

Listed

- The chemical is on the Inventory
- Can be introduced if it's within the terms of the Inventory listing
- Keep records

Exempted

- It's a very low-risk introduction
- Submit a once-off declaration after you introduce
- Keep records

Reported

- It's a low-risk introduction
- Submit a once-off report **before** you introduce
- Keep records

Assessed

- It's a medium- to high-risk introduction
- Apply for an assessment
- Assessment certificate needed **before** you introduce
- Keep records

Commercial Evaluation Authorisation

- Determine the chemical's commercial potential
- Apply for an authorisation
- Commercial Evaluation Authorisation needed before you introduce

Information to work out your introduction category

Must have

Chemical identity

If you don't have this information, you might need to contact your supplier

Might need

- Introduction volume
- Introduction concentration
- End use concentration
- End use
- Hazard information
- Specified class of introduction

Useful to have or know

- Whether it is a polymer
- The molecular weight of your polymer
- International assessment of your chemical

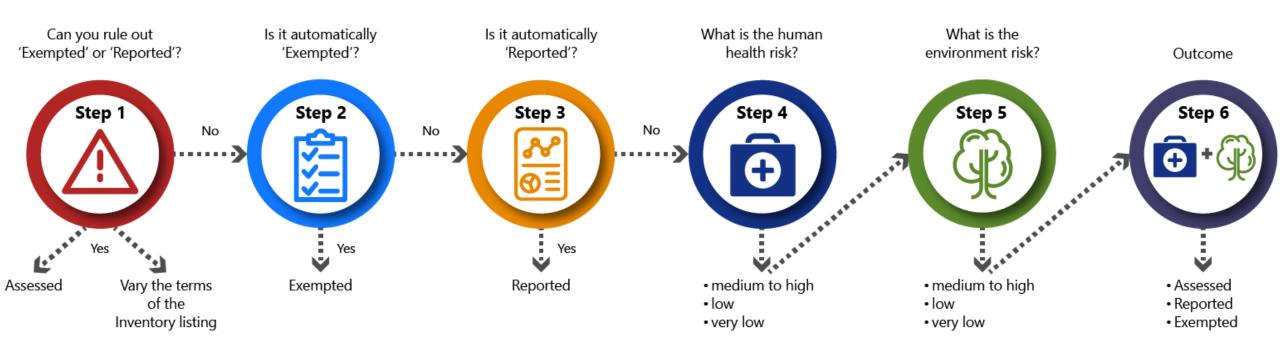

Step 0 – Check the Inventory

- Is your chemical on the Inventory?
 - NO go to Step 1 (next slide)
 - YES go to next question
- Is your **introduction** within the terms of the Inventory listing?
 - YES listed introduction category
 - NO not a listed introduction. For more details, see the Inventory video

Work out your introduction category

Outcome = your introduction category

- Exempted OR
- Reported OR
- Assessed

Thank you!
